Order Quantity Trends by Product Type

Slow Moving Inventory

Key Insights

- Supplier 4 has the highest procurement cost per unit (1.34) and the longest lead time (17 days), making it the most expensive and slowest to source.
- Supplier 1 is the best performing supplier, with the lowest defect rate (1.80%) and a competitive procurement cost.
- SKU34 has an abnormally high inventory turnover of 602, indicating a potential anomaly or an extremely fast-moving item.
- 80 SKUs are slow-moving, with turnover below average, which suggests overstocking risk and tied-up capital.
- Skincare has the highest order quantity (2,099), while stock levels remain relatively similar across categories.
